

## QMI POWER STEERING CLEANER KITS

— Clean away those high repair costs before they occur

### The problem

Power steering systems subject power steering fluids to high temperatures and pressures, causing oxidation, fluid deterioration and eventually breakdown, reducing lubricity while accumulating contaminants, varnish deposits, and abrasive wear metals and debris that grind seals, valves and friction surfaces. Lack of maintenance can inhibit steering, cause leaks and premature power steering unit failure.

Symptoms that the power steering system has gone too long without maintenance:

- Dark power steering fluid color
- Power steering unit noise or squeal
- Fluid leaks
- Rough or jerky turns
- Stiff steering on “cold starts”
- Hard turns

### The solution

Power steering system cleaning and fluid replacement before damage occurs will save customers major repair work and expensive power steering component replacement. Regular maintenance service provides the best “insurance” against high repair costs.

**1. QMI Power Steering Cleaner — EP83**

Safe, powerful cleaner dissolves and suspends deposits. Cleans the entire system of oxidized power steering fluid, varnish deposits, wear metals, debris and other contaminants.

**2. QMI Power Steering Fluid and Conditioner — EP84**

Formulated with highly refined base oils, friction modifiers and select additives designed to lubricate and protect all moving parts against squeal, chatter and wear, providing continuous hydraulic actuation under the severest of temperatures and conditions. Protects against oxidation and corrosion, foaming and clogging, conditions and revitalizes seals and o-rings.

**3. QMI Power Steering Treatment with PTFE — GL1630**

Protects power steering units with bonded PTFE treatment, like “wet ice on wet ice,” as a substitute wear surface that reduces heat and wear, and prolongs life while providing easier steering. (See QMI Power Steering Treatment product fact sheet for details.)

**Applications:** See application chart.

### Benefits

QMI Power Steering Cleaner Kit application cleans the power steering system completely, and replaces power steering fluid:

- Removes contaminants and deposits
- Removes abrasive wear metals and debris
- Reduces wear and premature component failure
- Restores quiet, smooth, uniform steering control
- Reduces costly repairs due to system failure
- Restores lubricity
- Restores ease of steering
- Reduces valve sticking and squeal
- Rejuvenates seals to help prevent fluid leaks
- Provides safe, secure steering

**Kit: QMI Power Steering Cleaner Kit — EP81** (Cleaner & Fluid, 3 kits per case)

**Kit: QMI Power Steering Cleaner Kit — EP82** (Cleaner, Fluid & Power Steering Treatment with PTFE, 3 kits per case)

**To order individually:** **QMI Power Steering Cleaner — EP83** (64 ounces, 6 per case)

**QMI Power Steering Fluid and Conditioner — EP84** (64 ounces, 6 per case)

**QMI Power Steering Treatment with PTFE — GL1630** (3 ounces, 24 per case)
