**RENU™**

## DIESEL FUEL SYSTEM CLEANER

RENU™ Diesel Fuel System Cleaner is specifically formulated for diesel engines. This concentrated formula enhances the performance of your engine by removing fuel deposits, efficiently cleaning injectors, air intake and combustion chambers. This exceptional product offers excellent corrosion control and reduces emissions.

### FEATURES & BENEFITS:

- ✓ Removes Fuel System Deposits
- ✓ Improves Fuel Lubricity
- ✓ Improves Fuel Storage Stability & Cold Flow Properties
- ✓ Reduces Emissions
- ✓ Improves Low Temperature Performance for Easier Starting

### SPECIFICATIONS:

**Product No:** FS21313  
**Net Weight:** 11 FL OZ  
**Case Quantity:** 12 Each

## DIESEL FUEL SYSTEM CLEANER

### PROBLEM

The longer carbon buildup remains in the fuel system, the more severe the damage to your vehicle and its engine life.

- ✓ In cold temperatures diesel fuel can thicken, causing resistance to fluid movement and result in slow startups.
- ✓ Fuel pumps and injectors rely on lubrication to function at their best and to avoid wearing out too quickly.
- ✓ Over time, stored diesel fuel can break down, which lessens the diesel fuel's combustion effectiveness.

### SOLUTION

RENU™ Diesel Fuel System Cleaner is proven to effectively remove deposits in the diesel fuel system and combustion chambers.

- ✓ This product improves fuel cetane levels to enhance your diesel engine's performance.
- ✓ RENU™ Diesel Fuel System Cleaner contains a fuel lubricity agent to protect the engine from the damaging effects of friction and wear.
- ✓ This exceptional product includes a fuel stabilizer that helps in preventing degradation when stored.

**Directions:** Pour into Diesel Fuel Tank.  
One bottle treats up to 30 gallons.
