

DIFFERENTIAL

LIMITED SLIP FRICTION MODIFIER

QMI® Limited Slip Friction Modifier is a gear oil top treatment product specially formulated to promote smooth clutch engagement and lessen chatter. This product is designed to enhance the performance of modern vehicles and is effective for all Limited Slip and posi-traction applications.

✓ FEATURES & BENEFITS:

- ✓ Promotes Smooth Clutch Engagement Without Chatter
- ✓ Enhances Performance of Rear Axle
- ✓ Improves Drivability
- ✓ Formulated for All Limited Slip and Posi-Traction Applications

SPECIFICATIONS:

Product No: GL1728
Net Weight: 4 FL OZ
Case Quantity: 24 Each

DIFFERENTIAL

LIMITED SLIP FRICTION MODIFIER

PROBLEM

Your vehicle's limited slip differential can experience a lack of fluidity and control if not well maintained.

- ✓ To avoid possible clutch grabbing, vibration and hinderance of axle rotation, your vehicle's Limited Slip Differential should be treated with a maintenance product.
- ✓ Without appropriate friction control in its gear oil, your vehicle may not perform at its best in harsh and slippery conditions.
- ✓ A treatment that is formulated to enhance the performance of your vehicle's limited slip differential would offer safety and improved traction.

SOLUTION

QMI® Limited Slip offers a more stable vehicle in unstable conditions.

An efficient limited slip differential improves your vehicle's performance and offers a major advantage in slippery conditions.

- ✓ QMI® Limited Slip Friction Modifier is formulated for smooth clutch engagement and lessens noise and vibration.
- ✓ This product will provide better control and enhance the performance of the rear axle, offering superior efficiency in your vehicle's Limited Slip Differential operation.

Directions: Add entire contents to differential before refilling. One bottle treats up to 64 OZ of Gear Oil. Add 1 additional OZ for each additional pint of fluid.
